D. Death penalty

165. As a sovereign state, Myanmar exercises its criminal justice system independently. However, as and when appropriate, it always takes international norms and standards into careful consideration. In Myanmar, domestic legal framework allows death penalty for heinous crimes committed against the population and the community. Despite the legal basis, no death sentence has been carried out since 1988.

VI. National initiatives, achievements, good practices and challenges

166. People of Myanmar inspire for peace, stability and development. Additionally, strengthening democratic system, better enjoyment of human rights and maturity in exercising basic rights are high on Myanmar's agenda.

167. Despite the challenges, the homegrown democratic transformation has been incrementally achieved without any bloodshed. This has not been possible without people's

full support and participation. The international community recognizes and supports Myanmar's reform process.

168. Furthermore, the Nationwide Ceasefire Agreement (NCA) is expected to ink in a very near future to secure durable peace in Myanmar. The signing of NCA will pave the way for political dialogues which will lay down foundations for a peaceful, harmonious and prosperous society.

169. Since Myanmar has ushered in new era, its all-round reforms have contributed remarkably to promotion and protection of human rights of its people. Traditionally, discrimination of any kind is not accepted and exercised. Increasing space in freedom of expression, peaceful assembly and associations enable Myanmar to stand tall in the region and beyond. Its economic reform has brought more foreign investment and influx of tourists to Myanmar creating job opportunities and better living standards for the people.

170. Notwithstanding the substantial progress in Myanmar reform process, Myanmar needs to cope with rapid changes in domestic and international atmosphere, the need to strike a balance between rights and responsibilities and the need to resort to dialogue avoiding confrontation. As an infant democracy, Myanmar requires more time and political space to surmount such challenges.

171. While people in urban areas and well-educated strata of life are enjoying the fruits of reform, more needs to be done for the grassroots level. As 70% of total population resides in the rural areas, poverty alleviation and rural area development still remain as one of the challenges. Myanmar still needs to create more job opportunities for grassroots level, to foster skilled labours, to develop better education system and to provide adequate nutrition for all walks of life. Myanmar also recognizes the need for highly efficient human resources in the country and measures in this regard has been made.

VII. Conclusion

172. **Since the Government of the Republic of the Union of Myanmar has assumed the State responsibility, it has been undertaking reforms to promote human rights and socio-economic development of the people taking into consideration democratic transition and consolidating democratic foundations in all aspects. It is evident that considerable progress has been made. As Myanmar is enjoying steady economic growth, the Government has laid down and is pursuing focused economic development plans to graduate Myanmar from the LDC status.**

173. **Since Myanmar is a multi-ethnic, multi-cultural and multi-religious country, the Government is consistently striving for them to live in harmony without discrimination against any races and nationalities. Myanmar has successfully hosted international and regional conferences and forums and has demonstrated its leadership in these events. In 2013, Myanmar successfully hosted the 27th Southeast Asia Games (SEA Games). In 2014, BIMSTEC summit, 24th and 25th ASEAN Summits were held in Myanmar successfully. In 2015, Myanmar successfully hosted the 7th CLMV and 6th ACMECS Summits. Those summits are the ones in which most of the heads of State and Government across the world have participated. The heads of State and Government have visited the country in recognition of the progress of Myanmar's reforms. The President of the Republic of the Union Myanmar, U Thein Sein has paid a series of State and working visits to other countries, further enhancing bilateral relations with them. Hence, it is the most successful period for Myanmar in the course of foreign relations.**

174. Tangible progress in Myanmar's reform process has been well received and recognized by the international community. Meanwhile, further strengthening the cooperation between Myanmar and the international partners in the field of human rights is a prerequisite to crystallize democratic reforms. Genuine dialogue, constructive cooperation, equal and fair treatment are also essential. Myanmar has all along adhered to the principles of universality, objectivity and non-selectivity in addressing human rights issues of any nation in the world. At the same time, Myanmar has been urging all to strictly avoid the practice of double standard and politicization. Myanmar believes these principles constitute a firm basis for international cooperation in promotion and protection of human rights. Against this backdrop, it is evident that the Government of the Republic of the Union of Myanmar has made tangible progress on promotion and protection of human rights as well as on national reconciliation and rule of law. As such, any country-specific resolution on Myanmar should no longer exist.

175. Like any other nascent democracies, Myanmar is trying its best to overcome inevitable challenges by utilizing its own resources and strength. At a time when Myanmar is making every effort for a democratic society, the international community is expected to continue their constructive engagement with and assistance to Myanmar.
